자기소개

I am Aki, a 22 year old individual striving to build my life. I am someone who enjoys seeking new experiences, learning languages, and reading manhwa. I have a passion for constantly trying out new things. Since my childhood, I have been interested in the field of design and have learned various aspects related to it. However, design alone wasn't enough for me. I have endeavored to learn new languages and explore new programs.

I have always loved exploring the world, but now I feel the desire to settle down somewhere and establish my life. Therefore, I have decided to continue my life in Korea. I am eager to dedicate myself to a job, believing that this will enable me to establish a stable and organized life. Rules and order are important to me, but I am facing several challenges, especially obtaining a visa, to continue living in Korea. I seek your support in overcoming these challenges. I hope to have enriching experiences in your company and appreciate the opportunity you may provide me with.

Thank you for considering my application.
